IMPLEMENTATION STEPS

GOAL

#1

Songwriting

GOAL

#2

Verbal Processing/Discussion

1) Introduce the song and songwriting prompt.

- Pass out the leaves and lyric sheets.
- Display the prompt picture and tree, and explain experience
- Listen to the recording of the song together
- Explain to clients that this songwriting experience explore transitions--going from one thing to the opposite: just like summer transitioning to winter!

2) Begin writing

- Prompt clients to write out opposites/transitions on their leaves. You can display an example that is appropriate, such as "Play" on a green leaf and "Work" on an orange leaf

3) Add Words to Lyrics & Visual

- Place the green and orange leaf on opposite sides of the tree, and take a moment to discuss and validate each other's offerings
- Write the words into the blanks on the lyric, with each pair on their own line in the verse
- Sing the chorus and rewritten verse together

Adaptation Ideas:

- **For cognitive goals:** pre-write matching pairs on leaves, and have your clients match them up. You can use the original lyrics or write your own
- **Take the song literally:** do a rewrite based on the changing season in your geographical area. How do the clothes change? The weather? The activities? Nature? Holidays? Foods?
- **Add in instrument play:** a tamourbine is right at home here!
- **For groups:** divide the group in half and have them go back and forth singing phrases
